

FEATURES AND BENEFITS

The powerful forced-air refrigeration system holds the storage cabinet at a constant temperature. Evaporator fans and a newly designed louver allows uniform distribution of cold air. "Tecumseh" compressor provides high energy for this unit's perfect performance. Minimum watt heater with automatic on or off sensor in cabinet frame. Solid Door Freezers are designed with over-size evaporators and condensers for faster cooling and better efficiency.

- Defrost Timer System
- Excellent Cooling System
- Efficient Refrigeration System
- Front Breathing
- Adjustable Epoxy Wire Shelves
- Durable and Easy to Adjust
- High-Density Polyurethane Foam Cell Insulation (CFC Free)
- Holds 0°F ~10°F
- ETL Sanitation Approval
- Specifications Subject to Change Without Notice
